Gary,

I will forward you communication that we have had with the laboratory over the last couple of days. It appears that the result is valid. We will confirm the information once we receive the final Level IV data package.

Kristie:

Derrick indicated that there may have been a problem with the analysis based upon your chemist review and you are discussing this with Accutest. Could you please give me an update so that we can determine when to move forward with submitting the profile to the disposal facility. Because the levels are so high, we are being asked to drum the bulk materials into 55 gallon poly drums and I want to make sure that the data is accurate before we move forward.

Thanks

Gary Moore
